**Desired Outcomes for California Public Health Leadership Institute**

**Leadership Academy Workshop**

November 30, 2010

- Shared understanding about how the current context with health reform and the Accountable Care Act (ACA) is creating a need to find common ground among health sector providers for the purpose of improving not just population but community health.

- Shared understanding about the importance of leaders and leadership is to initiate, support, and sustain this work.

- Enhanced understanding about the new policy and innovation drivers in ACA to encourage health provider behaviors that will improve community health.

- A shared language for this health reform era.

- Increased knowledge of the roles and current activities of health sector partners in improving community health.

- Identification of opportunities to find common ground with your health sector partners in your community/region/State.

- Commitment to move forward, take action, and enhance partnerships to improve your community’s health.
