Debbie Lou is the program analyst with Active Living Research, a national program of the Robert Wood Johnson Foundation. Debbie engages advocacy, policy, and community groups to develop opportunities for research translation and dissemination, especially to ensure the research meets the needs of communities at highest risk for childhood obesity.

Debbie is co-author of a research synthesis with Dr. Wendell Taylor titled “Do All Children Have Places to be Active?” This synthesis reviews evidence showing that lower-income people and racial and ethnic minorities often live in communities that discourage active living.

Renee Kuhlman
Director of Special Projects
National Trust for Historic Preservation

Renee Kuhlman works for the National Trust for Historic Preservation helping states preserve their historic places. Between 2008-2012, Kuhlman directed the Helping Johnny Walk to School: Sustaining Communities through Smart Policy project which provided grants, technical assistance, and educational materials to encourage more community-centered schools. In 2010, the National Trust released the policy report she wrote that summarizes the many government actions that could encourage more community-centered schools.

Ian Thomas is the founding Executive Director of the PedNet Coalition of Columbia, MO, whose vision is a "healthy and active community." During twelve years in health policy advocacy, Ian has led efforts to build a local movement with more than 7,000 members, pass the first Complete Streets policy in Missouri, develop the largest Walking School Bus program in the United States, and institutionalize Health Impact Assessment within the City, County, and School District. Ian is a Board Member with America Walks and holds seats on the Safe Routes to School National Partnership Steering Committee and the Safe Routes to School National Review Group.

Dr. Sayers was trained as an exercise physiologist at the University of Massachusetts and joined the faculty of the University of Missouri in 2003. He is currently an associate professor and Director of Scholarly Activity in the Physical Therapy department in the School of Health Professions. His research program focuses on the evaluation of physical activity behaviors of adults and children and how infrastructure changes may help in the prevention of obesity-related chronic diseases. Dr. Sayers has been funded by granting agencies such as the NIH, the Robert Wood Johnson Foundation, the Arthritis Foundation, the American College of Rheumatology, and HealthSouth Corporation.
