The Relationship Between Public Health & Criminal Justice

UPFRONT
- Education
- Public Health

IN THE THICK
- Behavior Modification

AFTER THE FACT
- Punishment
- Criminal Justice

Three Intervention Levels
Public Health Contributions to Preventing Violence

We know how to prevent violence before it occurs. There is a strong and growing evidence base, grounded in research and practitioner and community wisdom, that prevention works. Investments in preventing violence pay off, and reducing violence is an effective way to stimulate economic development in communities. The public health field complements criminal justice approaches and brings an important perspective to addressing the problem of violence that affects young people. This fact sheet summarizes important contributions made by the public health field.
Blueprint for Action: Preventing Youth Violence in Minneapolis

- Connect all youth to trusted adults
- Intervene at the first sign of risk for violence
- Restore youth who have gone down the wrong path
