PLAN OF ACTION

U.S. – VIETNAM DIALOGUE GROUP ON AGENT ORANGE/DIOXIN
2010 - 2019

WASHINGTON AND HANOI • JUNE 2010

THE ASPEN INSTITUTE
Ho Chi Minh City, Disabilities Resource & Development - Club for Young Adults with Disabilities
The following two slides were not discussed in Q&A but are included here. These are the key elements in responding to the needs of people in Vietnam.
Health-priorities

• Continue a public health campaign to promote safe food habits among people living near known and suspected hot spots so they avoid foodstuffs such as fish, ducks and mollusks possibly contaminated by dioxin.

• Support health care and prenatal care information and services.

• Develop a system for maternal surveillance and screening, monitoring of child development and early-childhood intervention.
Disabilities - priorities

• Carry out a survey of people with disabilities and create a birth defects registry.
• Adapt and expand a case management approach and integrated services and respite centers for people with disabilities.
• Support the development of the community of Vietnamese with disabilities so they can partner with local and national authorities to ensure lives of dignity and opportunity for people with disabilities and implement Vietnam’s Law on Disabilities and the UN Convention on the Rights of People with Disabilities.
• Create systems for job training and leadership development for young adults with disabilities.
