OSHPD’s Hospital Community Benefit Plan Program

Ron Spingarn, Deputy Director
Healthcare Information Division
Office of Statewide Health Planning and Development

July 17, 2013

www.oshpd.ca.gov
Senate Bill 697 (Torres, 1994)

Required California non-profit, community hospitals (~220) to:

- Conduct a Community Health Needs Assessment every 3 years
- Develop a Community Benefit Plan in consultation with community
- Submit Community Benefit Plan to OSHPD every hospital fiscal year

Exempted these hospitals:

- For-Profit
- Small and Rural
- Public (County, District, University of California)
- Shriners (Children’s)
- Chemical Dependency Recovery
Hospitals Required to Submit Community Benefit Plans

California

San Francisco Bay Area

Los Angeles Area
Statutory Provisions: Community Benefit Plans

Defines 8 types of benefits including:

- Charity Care
- Unreimbursed Cost of Government-Sponsored Patients
- Financial/In-Kind Support of Public Health Programs
- Donations for a Community Priority

Requires that Community Benefit Plans include:

- Benefits organized into 5 categories
- Measurable objectives with specified timeframes
- Mechanism to evaluate the effectiveness of the plan

---

NOTE: Specific formats for needs assessments, benefit plans or reports cannot be required unless enacted by the Legislature.

Healthcare Information Division
The Hospital Community Benefit Program

Private not-for-profit hospitals assess community needs, develop plans to address priorities, and report on community benefits.

The Hospital Community Benefit Program (HCBP), is a result of legislation passed in 1994 (SB 697). The enabling legislation states that private not-for-profit hospitals "assume a social obligation to provide community benefits in the public interest" in exchange for their tax-exempt status.

Therefore, under the community benefit legislation, a private not-for-profit hospital in California is required to:

- Conduct a community needs assessment every three years
- Develop a community benefit plan in consultation with the community
- Annually submit a copy of its plan to the Office of Statewide Health Planning and Development (OSHPD)

To download a hospital's Community Benefit Plan for the most recent reporting year, click on the image on the right of this page. To obtain copies of plans for prior years, contact the Healthcare Information Resource Center (HIRC) – see contact information below.

A listing of hospitals that have or are required to submit a community benefit plan are available here. For each hospital, the file includes the OSHPD facility number, name, parent company, fiscal year end, report due date, date received, and extended due date, if applicable. Each reporting year appears as a separate worksheet.

- Methodist Hospital of Sacramento
- Sutter Medical Center - Sacramento
OSHPD Has:
Area-Level Prevention Quality Indicators (PQIs)

Healthcare Information Division
AHRQ - Prevention Quality Indicators (PQIs)

Area-level (Statewide, County) for California

The Agency for Healthcare Research and Quality (AHRQ) has developed four types of Quality Indicators (QIs), measures of healthcare quality, that make use of hospital inpatient discharge data.

Prevention Quality Indicators (PQIs) identify hospital admissions that evidence suggests may have been avoided through access to high-quality outpatient care. The PQIs are also called "ambulatory care-sensitive conditions" or "preventable hospitalizations." These measures assess the quality of the healthcare system as a whole, especially ambulatory care, in preventing hospitalizations due to potentially-avoidable medical complications.

Area-Level (Statewide, County) hospitalization rates are provided for the following PQI measures:
- PQI #1 Diabetes Short-term Complications
- PQI #2 Perforated Appendix (ruptured appendix)
- PQI #3 Diabetes Long-term Complications
- PQI #5 Chronic Obstructive Pulmonary Disease (COPD) (chronic bronchitis or emphysema) or Asthma in Older Adults
- PQI #7 Hypertension (high blood pressure)
- PQI #8 Heart Failure
- PQI #10 Dehydration
- PQI #11 Bacterial Pneumonia
- PQI #12 Urinary Tract Infections (UTI)
- PQI #13 Angina without Procedure (chest pain)
- PQI #14 Uncontrolled Diabetes
- PQI #15 Asthma in Younger Adults
- PQI #16 Lower-extremity Amputations among Patients with Diabetes (removal of leg or foot due to diabetes complications)
PQI #1: Diabetes Short Term Complications
Alameda County vs. State, 2007-2011
